

EXECUTIVE SUMMARY

PERIOD - Aug 2014 - May 2016 (1 Year & 10 Months)

Testimonials:

Dr. Fabio Titi - General Manager

Mr. Akramullah Hussain- Operations Manager

Project Site- Bu Hasa Valves replacement project for GASCO (NGL)

Headed the EPCM project for design, procurement, installation & commissioning of ESD valves and SA/DA actuators at GASCO's NGL facility at Bu Hasa in UAE. Project Value around 7.5 Million USD.

Engineering - Completed by FEED Contractor - TEBODIN Bilfinger ME. Major decisions include

- TBE and selection of major valve and actuator vendors
- Site surveys and co-ordination for intricate fitment of components during replacement of 30year old valves with actuators
- DCS/ESD related E&I scopes as implemented by Honeywell

Major **Procurement** includes

- 23 ESD Valves by MSA (Czech Rep),
- 23 Double Acting pneumatic Actuators by Rotork (Germany)
- 28 nos Single and Double acting quarter turn actuators by CAI (France)
- Factory acceptance and Site acceptance of all valves and actuators

Construction / Commissioning challenges include

- Shutdown management for replacement of actuators without changing valves during one day events and for replacement of 23 main ESD valves during the major shutdown of the plant
- Intricate rigging studies for replacements during major shutdown

Specific Achievement - Project achieved mechanical completion 6 months ahead of scheduled date and also completed within budget (15%). All Five shutdowns (**Apr 15, May 15, Oct 15, Nov 15 & Apr 16**) completed safely with planned rehabilitation of new CAI actuators (28nos) and new MSA Valves & ROTORK Actuators (23nos). Close to 20000 Inch Dia Plant LTCS/CS Piping (6" to 36") revamped including Engineering, prefabrication, construction and commissioning as per Tebodin design during the course of reinstallation!

Parallely Initiated - EPC Project for H2S GAS Removal Facility at ICAD

EXECUTIVE SUMMARY

Between April 2016 and Oct 2016 handled the Initiation of EPC project for H₂S removal facility installation at existing CRS @ ICAD near Musaffah (Project Value around 10 million USD)

Responsibilities included commencement of Engineering with sub con (WG Kenny), commencement of HSEIA Studies including obtaining Deminimus status report from ADNOC up to Geo technical investigations (GEO and Topo) and site facilities commencement. Procurement initiative included TBES for Catalyst (Johnson Matthey) and Scrubber Vessels (Descon-Sharjah). After formation of the core team, project handed over to the New PM Team.
