Right Tool Bar

Edit
Use the Edit toolbar to add, delete, cut, copy, and paste data objects, dissolve and link activities, undo an action, and much more.

Assign
Use the Assign toolbar to assign resources, roles, activity code values, predecessors, successors, and activity step templates to the activity you select in the Activities window.

Move
Use the Move toolbar to move the selected object around in hierarchy views.

Workspace Basics

There are eleven (11) main windows in P6 Professional. You can open as many windows as necessary; each open window displays as a tab below the active tab title bar.

The name of the currently active window appears in the active tab title bar.

Global (Enterprise) data windows

- **Projects window** — Use to globally review the global enterprise project structure (EPS), and to work with individual projects.
- **Resources window** — Use to add or modify your organization's resources.
- **Reports window** — Use to produce reports for all projects or the open project. To open the Reports window, choose Tools, Reports, Reports.
- **Tracking window** — Use to display and create tracking layouts for the open project.

Project-specific data windows

- **Work Breakdown Structure window** — Use to add or modify the open project's work breakdown structure (WBS).
- **Activities Window** — Use to work with activities in the open project.
- **Resource Assignments window** — Use to view, add, and delete resources assigned to activities.
- **WPs and Docs window** — Use to create and assign work products and documents for the open project.
- **Project Expenses window** — Use to work with expense items for the open project.
- **Project Thresholds window** — Use to add or delete thresholds for the open project.
- **Project Issues window** — Use to add or delete issues for the open project, review issue history, and notify other team members of issues.
