

Notes:
1) This document refers to the look and feel of a typical P6 Interface
2) In particular this is for the benefit of the beginners to help them navigate in and out of numerous windows
3) P6 is primarily broken into various ribbons (verticle and horizontal), divided into flexible windows which can be resized at will and those which can be toggled to remain active or inative
4) While working with P6 the database takes full command and the view ports are flexible . To reach and work on any particular layout , know how of precise navigation tricks is very important.
